Technical Skills

Languages: Java, JavaScript, C#

Databases: SQL, Server SQL

Web Technologies : HTML, CSS, Tailwind CSS, Bootstrap, ReactJS

Frameworks & Tools: Spring Boot, Hibernate, OAuth2, REST API's, Docker, GitHub, Maven, Postman, zira

Soft Skills: Written and verbal communication, cross-functional collaboration, and task prioritization

Experience

Java Backend Developer

September 2025 – Present

ERP Daddy | Current

- Streamlined API code using **Java** and **Spring Boot**, leading to **90%** speed improvement, and reduced code complexity by **20%** via query refactoring efforts.
- Resolved **N+1 query issues** and optimized database interactions in **SQL Server**, significantly enhancing application performance and scalability.
- Implemented authentication and role-based authorization using Spring Security, enforcing access control across **3 user roles** (Super Admin, Admin, User) and securing **100% of application endpoints**

Software Developer Intern

May 2025 – August 2025

ATF Labs | Agra

- Built responsive web applications using **React 18+**, developing reusable UI components with **Material UI** and **React-Bootstrap**; improved user engagement by **25%** through clearer layouts and consistent interface design.
- Constructed and enhanced **RESTful APIs**, reducing API response times by up to **30%** through code refactoring and performance tuning.
- Optimized **SQL Server** and **PostgreSQL** queries and **stored procedures**, reducing average query execution time by **20%** across critical database operations.

Project Work

Cloud Share – Cloud File Sharing Platform

Link: <https://cloud-share-seven.vercel.app/>

Java, Spring Boot, Spring Security, JWT, Lombok, JPA/Hibernate, MySQL

- Engineered a full-stack cloud file-sharing platform with React.js and Spring Boot, implementing Clerk-based authentication and **REST APIs supporting 20+ core endpoints**.
- Integrated Razorpay for a **credit-based payment system**, tracking **100% of user transactions and usage events** using MongoDB and Supabase.
- Deployed and maintained a mobile-responsive production application on Vercel and Render, supporting **secure file access via role and link-based controls**.

Code Editor (Web-Based IDE)

GitHub: <https://github.com/Bhupendra-Verma1/Apium>

Spring Boot, JPA, Gemini AI API, Docker, Monaco Editor, React, Tailwind CSS

- Delivered a full-stack web IDE supporting **Java, Python**, and **10+** programming languages, with **real-time** preview and **auto-refresh** functionality.
- Programmed **20+ RESTful APIs** using **Spring Boot** to store, retrieve, and manage code snippets securely.
- Integrated Monaco Editor to enable in-browser code editing with **syntax highlighting for 10+ coding languages**.

Certifications

- Master Spring Boot 3 and Spring framework 6 with java** (Udemy)
- React.js Frontend Certificate** (HackerRank)
- Responsive Web Design Certification** (freeCodeCamp)
- C Programming and Data Structure and Algorithm** (DD Informatics)

Education

Uttam Institute of Technology and Management Studies

August 2022 – June 2025

Bachelor of Computer Application

Runakata, Agra
